Equipment Installation & Maintenance

MINITEK Learning

Online Safety Induction:

The MINITEK safety training course has been developed to ensure our customers under-stand how to identify and handle hazardous substances.

The course has been designed to provide competency in the following areas:

- -Determine whether a chemical is hazardous or dangerous.
- -Determine the personal protective equipment necessary for handling a given chemical.
- -Identify health and hazard information.
- -Know the location of Safety Data and Product Information Sheets at your site.
- -Understand the general rules for using chemicals
- -Know the basic first ald procedures for chemical contact.
- -Know how to manage and clean up a chemical spill.

Once the final question has been submitted, a report and certificate are automatically gener ated. Both can be downloaded and/or printed. Also, a report will be sent to the email address entered during registration.
